SUMMARY

Full-stack software engineer with a strong .NET and C# foundation, sharpened through production work at Ford Motor Company. Experienced across the development lifecycle — from requirements gathering and QA to CI/CD deployment and documentation. Brings a collaborative, cross-functional approach with additional depth in Python, React, and cloud platforms (Azure, AWS, GCP).

CORE COMPETENCIES

Technical & Business Skills: Technical Support | Customer Service | Client Communication | Problem Solving | Root Cause Analysis | Issue Resolution | Incident Documentation | Technical Documentation | Knowledge Base Creation | QA Testing | Business Analysis | Requirements Evaluation | Agile Methodology | Enterprise System Management | REST APIs | Networking Fundamentals (DNS, TCP/IP) | Windows OS Troubleshooting

Business Tools & Systems: Microsoft 365 | Excel | Power BI | SharePoint | Teams | Outlook | Salesforce | Zendesk | Ticketing Systems | Remote Support Tools | Active Directory | Virtual Desktop Environments (VDI)

Cloud, Systems & Infrastructure: Microsoft Azure | AWS | GCP | Windows | Linux / CLI | Active Directory | SQL / MSSQL | MongoDB

Software Development & Engineering: Python | JavaScript | TypeScript | Java | C# | ASP.NET Core 3.1 / .NET Core 3.1 | HTML/CSS | SASS | React | Vue | Node.js | Express.js | REST APIs | JSON | XML | Git | GitHub | Visual Studio

Design & Creative Tools: Procreate | Canva | Adobe Creative Suite

PROFESSIONAL DEVELOPMENT

CompTIA — Network+, Security+ | Expected Apr. 2026

Certified Business Professional in Customer Service (CBP) | Focus: HOPE / IBTA, 2012

EXPERIENCE

Technical Consultant | BluPix — Blupix.me, Southfield, MI | Jan 2020 – Present

- Designed and delivered comprehensive branding materials and strategies for clients using **Procreate**, **Canva**, and **Adobe Creative Suite**
- Troubleshot **REST API** integrations and third-party service connections, resolving authentication, data sync, and JSON/XML connectivity issues
- Developed **AI** chatbot in **Python** for automated customer support, reducing client response times and increasing engagement.
- Created technical documentation and user guides, ensuring successful feature adoption and reducing support requests.
- Tech Stack:** *Python | REST APIs | JSON | XML | Procreate | Canva | Adobe Creative Suite*

Web Developer | Advantage Resourcing & Ford Motor Company (Contract), Allen Park, MI | Sep 2019 – Jan 2022

- Provided technical support and escalation handling for 50+ call center staff using internal web applications built with **C#**, **.NET**, and **MS SQL**
- Executed functional and regression testing, troubleshot UI/UX issues, system bugs, and application errors in the production environment, reducing support tickets by 30%
- Collaborated in **Agile** development team to resolve technical incidents and prioritize bug fixes based on business impact and severity
- Created comprehensive technical documentation for scheduling and resource management features, facilitating knowledge transfer and user adoption
- Automated build and deployment workflows for internal call center web applications at Ford using **Azure CI/CD** pipelines, reducing release cycle time and supporting seamless operations across 50+ call center agents.
- Tech Stack:** *C# | ASP.NET Core 3.1 / .NET Core 3.1 | MS SQL | Visual Studio | Azure CI/CD Pipelines | Azure DevOps | Git | Agile / Scrum*

Web Developer Intern | Blue Cross Blue Shield of Michigan, Detroit, MI | Sep 2018 – Mar 2019

- Contributed to business readiness and system validation for internal business tools by developing **SharePoint** pages and web features, analyzing requirements, and documenting findings — collaborating with stakeholders and a supervisor to identify gaps and support smooth integration.
- Developed and tested web features using **Java**, **JavaScript**, **HTML/CSS**, and **MS SQL**; validated data integrity and cross-platform functionality
- Created leadership-level reporting dashboards and presentations using **Excel**, **Power BI** and **PowerPoint** to communicate project status and system performance
- **Tech Stack:** *Java | JavaScript | HTML/CSS | MS SQL | SharePoint | Excel | Power BI | PowerPoint*

IT Intern | Blue Cross Blue Shield of Michigan, Detroit, MI | Feb 2016 – Jul 2018

- Led a team of 5 interns to research and develop strategic recommendations for improving the BCBSM mobile app's reach among younger audiences, designing visual assets in **Procreate**, and delivering a formal **PowerPoint** presentation to leadership
- Administered mobile device management (MDM) policies and device inventory tracking for a large organization, leveraging **Microsoft Intune** and **Azure AD**, ensuring security compliance and operational efficiency.
- Provided technical support for hardware and software issues across MacOS, Linux, and Windows systems with under 30-minute response time
- Troubleshoot technical issues through systematic diagnostics, achieving 98% first-contact resolution rate and high customer satisfaction
- Documented support interactions and developed troubleshooting guides for internal knowledge base, improving team efficiency and reducing escalations
- **Tech Stack:** *Microsoft Intune | Azure AD | Active Directory | Windows | MacOS | Linux | Microsoft 365 | Procreate*

EDUCATION & CERTIFICATIONS

B.S. in Cloud and Network Engineering | Western Governors University | Expected Dec. 2026

Facebook Java Developer Bootcamp | Grand Circus, Detroit, MI | Sep 2019

B.S. in Computer Science (coursework completed) | University of Michigan, Ann Arbor, MI | 2010–2014
